“Saving life of a soldier is more important than killing an enemy”

CPR MASK

CARDIOPULMONARY RESUSCITATION MASK

PVMS No: 290063

DELUXE CPR MASK

1. Lift patient's head backwards.

THIS SIDE UP

2. Position mask on patient. Breathe in through mask and out through patient's nostrils.

3. Introduce device to patient's mouth between teeth.

4. Deliver breaths and repeat frequently. 3 times into this every 4 seconds.

latex free
SINGLE USE ONLY

EmRescue has innovated a **CPR mask** that serves multiple purposes. It ensures an airtight seal between the mouths of both the paramedic and the victim. Additionally, it prevents the tongue from falling backward, and it provides ample space for the paramedic to pinch the nose and lift the jaw, tasks that can be challenging otherwise.

KEY FEATURES:

- The use of the EmRescue CPR mask lowers the risk of pathogen transmission between the patient and the rescuer in both directions.
- The mask safeguards against potential patient vomiting during CPR resuscitation.

Instructions for use

1 Tear open the pouch

2 Unfold the CPR mask

3 Insert long part of tube in the victim's mouth. Keeping in mind to place it above tongue.

4 Hold upper part of tube in your mouth & blow air into the victim's mouth 10-15 time in minute

Ordering information	CPR Mask Cardiopulmonary Resuscitation Mask
