# UEM SPLINT

PVMS No: 290065

## Universal Emergency Splint

**UEM Splint** is a medical device used to immobilize and support a fractured or injured bone or joint.

Its primary purpose is to prevent further movement of the injured area, which helps alleviate pain, reduce the risk of additional injury, and promote proper healing.

**Key Feature:**

- UEM Splint can offer support to various body parts without requiring any specialized equipment.
- It can be adjusted in both its length and width according to specific needs.
- The side strips are adjustable and serve the purpose of molding the splint, either into a straight or bent shape to provide comfort.

**PRODUCT SPECIFICATION**

- UEM Splint is made of 3 large, 3 small & 2 side plastic strips.
- Side strips are movable. These are used to give shape, straight or bent to the splint.
- Inside of splint has loop and outside has hook fastener.
- Wrap around fastener strips are loop and elastic for comfortable application.
- Supplied in a carry bag if required with outer vacuum packing.
